PROFESSIONAL PROFILE

Aspiring Software Engineer with a strong interest in software development, problem-solving, and web technologies. Skilled in Java, object-oriented programming, and data structures, with experience developing academic and personal projects. Eager to apply technical knowledge, learn from industry professionals, and contribute to innovative software solutions in a collaborative environment

PROJECTS

Parkiyō – Vehicle Parking Management System

March 2026 - May 2026

Self-based, AI-assisted

Technologies: Java, Spring Boot, Thymeleaf, MySQL, Spring Security, Hibernate/JPA, Maven

- Built a parking management SaaS platform with vehicle registration, slot management, reservations, payments, and reporting features.
- Implemented secure user authentication, role-based access control, audit logging, and notification systems.
- Developed responsive admin and user dashboards using Spring Boot, Thymeleaf, and MySQL.

BulkMail – Bulk Email Sending System

May 2025 - June 2025

Self-based

Technologies: React.js, Node.js, Express.js, MongoDB, Nodemailer, JavaScript

- Built a bulk email management platform that enables sending emails to multiple recipients simultaneously.
- Developed RESTful APIs using Express.js and integrated MongoDB for storing email credentials and application data.
- Implemented email delivery functionality using Nodemailer with Gmail SMTP integration.
- Designed a responsive user interface with React.js for composing messages and managing recipient lists.
